Mathura, India

#### **Education**

2021-2025 B.Tech. in *Industrial & Systems Engineering -* **Indian Institute of Technology, Kharagpur** CGPA **8.40** 

### Experience

• Software Engineering Intern | AWSMO

Apr '24 - Present

- Streamlined ML workflow, achieving 55% faster execution & 50% greater scalability with AWS Batch & CloudFormation
- Enhanced deployment efficiency by 100% through CI/CD pipelines and unit tests covering ~80% of the code base
- Identified 17 bottlenecks across all services via a benchmarking framework written in Go, Python, and Terraform
- Optimized time series data parsing by 40% by implementing efficient business logic in the Django REST Framework
- Enhanced log analysis efficiency by 90% by self-hosting a distributed logging architecture using the ELK/EFK stack

### **Projects**

Naarad | Go, Python

Jun '24 - Jul '24

- Deployed a student-run noticeboard service for IIT Kharagpur community, serving over 7000 daily active users
- Managed deployment on **Digital Ocean** with **Docker**, leveraging **GitHub Actions** for **CI/CD**, scaling for over **15,000** users
- Reduced unauthorized access attempts by 30%; OTP and nginx rules restrict only sign-up/sign-in to the campus network
- Integrated with MFTP, delivering students real-time placement portal notices, with a delivery delay of under 3 minutes

Apnalnsti | Django, AWS

Jan '24 - Feb '24

- Published an official mobile app for IIT KGP, increasing student involvement by 30% in institute-organized activities
- Orchestrated deployment on AWS EC2, utilizing CodeDeploy & CodePipeline, scaled for 10,000+ users with AWS ECS
- Designed travel share and buy/sell portal; spearheaded a team of 10 developers, developing in Django and React Native
- Engineered a real-time scoreboard feature, serving 5000+ concurrent users, using Go, PostgreSQL & WebSockets

• Metahub | C, Bash, Linux Utilities

Jan '23 - May '2.

- Revamped a PtokaX-based P2P file-sharing service exclusive to IIT Kharagpur, catering 50TB+ of content to 800+ users
- Resolved compilation errors & a ban functionality bug, **increasing server stability by 30%** & ensuring a smooth installation
- Engineered automation & monitoring scripts, & set up fallback for uninterrupted server availability, ensuring 95% up-time

GSYNC | Bash, Linux Utilities

Apr '22 - May '22

- Developed a **CLI** tool for **real-time file & folder synchronization** from *local to remote git repositories*, with **100% efficiency**
- Implemented 8 service functionalities start, stop, status, restart, enable, & disable, with innovative selective start/stop
- Elevated user experience by 40% with intuitive logs management and troubleshooting, with support for macOS and Linux

#### **Achievements**

• Inter-IIT Tech Meet 12.0 | Contingent Gold

Nov '23 - Dec '23

- Secured first place for the third consecutive time, contributing to cloud architecture, blockchain, and backend tech stack
- Patched 2 Aptos library bugs & designed a novel Metamask Snap allowing transacting Aptos coin via Metamask Wallet

### Positions of Responsibility

Maintainer | Metakgp, IIT Kharagpur

Aug '23 - Present

- Developed and maintained over 20 open-source projects for IIT Kharagpur students, easing out various stressful processes
- Published IQPS, a Go, PostgreSQL, and Svelte app, hosting 500+ question papers over 19 years with vector search
- Deployed Kronos, a web app in Python that collects and analyzes 12,500+ records, providing detailed grade distributions

Advisor, FOSS United Club Lead | Kharagpur Open Source Society, IIT Kharagpur

May '22 - Present

- Organised **over 15 workshops**, promoting and advocating the adoption of **open-source software** amongst the students
- Organised Kharagpur Winter of Code-('22 and '23), inspired by Google Summer of Code, with 1.2k+ and 2.5k+ participants

Technology Coordinator | Technology Students' Gymkhana, IIT Kharagpur

Jul '23 - Jul '24

- Oversaw technological advancements at IIT Kharagpur; assisted in resolving over 200 student complaints every month
- Achieved a 90% reduction in site build size by migrating static data to PostgreSQL using efficient Python & Bash scripts
- Migrated from AWS to on-premise server; leveraged Proxmox for 3-layered system design and novel CI/CD pipelines

#### **Technical Skills**

Languages	Python, Bash, Go, TypeScript, JavaScript
Frameworks	Django, Flask, Go-Fiber, Express.js
DBMS	PostgreSQL, MongoDB, MySQL
DevOps	Networking, Linux Administration, Docker, Nginx, Cloudflare, Terraform, Amazon Web Services
	(AWS), Jenkins, Argo CD, GitHub Actions, EFK/ELK (Elasticsearch, Filebeat/Logstash, Kibana)
